

HeatSet LWC

HeatSet LWC series is specially designed for a huge variety of different paper grades (LWC, SC, uncoated papers as well as newsprint). Outstanding print stability and press performance are key features of **HeatSet LWC** series.

The low tack of **HeatSet LWC** series provides optimum print results even on paper grades which are sensitive to picking and piling. Printing **HeatSet LWC** series minimizes the risk of build-up problems on blankets and plates even if sensitive paper grades to have be printed.

Carefully selected raw materials in combination with the most modern production line for offset inks in the world make sure that **HeatSet LWC** series performs always safely, reliable and constantly on all kinds of printing presses.

Also suitable for print jobs on high grade papers or if high gloss in combination with very low dot gain and best contrast is required.

HeatSet LWC series already complies to all requirements of the award criteria of the Blue Angel for printed matter (DE UZ-195 Edition January 2021).

Properties of the HeatSet LWC:

- Fast drying
- Good rub resistance
- Excellent gloss
- Very good printing properties
- Minimum wash intervals
- Meets the ISO 2846-1 standard
- Very stable ink-water balance
- Formulated to be used with or without alcohol

Packaging size:

- 23 kg pail
- 200 kg barrel
- 900 kg inducontainer
